# Forum Nokia Consumer Applications

Spring 2005

NOKIA

## The World's Best Mobile Content, Right At Hand

Life is going mobile, and you hold in your hands the very best applications developed for the hundreds of millions of consumers ready to do more with their mobile devices.

For years, Nokia has nurtured the creation of a global development environment to produce innovative mobile applications and content that fully leverage the capabilities of Nokia's Developer Platforms. Through Forum Nokia, the world's largest mobile development community, we are always looking for the top developers, applications, and services available. The applications and services featured in this catalog were chosen based on market potential, creativity, quality, ease of use, and how well they showcase the functionality of Nokia Developer Platforms.

This catalog represents the "best of the best" — featuring the top work from Forum Nokia members, including many who are also part of Forum Nokia PRO. Forum Nokia PRO is our premier developer support program, accelerating the introduction of innovative mobile applications by connecting the world's best developers to the very latest information, tools, and techniques in mobile development.

Forum Nokia PRO provides a premium level of technical resources and business development support, including:

- Exclusive access to Nokia Developer Platform roadmaps.
- Early access to devices and SDKs.
- Preferential access to technical, training, and support services.
- Business development, co-marketing, and media relations support.
- A streamlined application sales channel for direct and profitable access to operators and other leading channels worldwide.

For more information about Forum Nokia PRO, please visit www.forum.nokia.com/pro.

Operators, aggregators, and anyone else involved in sourcing applications should go to **www.nokia.com/developer** for more information.

## Market Segments

The Forum Nokia Consumer Applications Catalog includes applications that help meet the unique needs of a mobile lifestyle. Whether it's a mobile version of a popular game or a title unique to handheld devices, there's probably a version available for Nokia platforms. The catalog also includes extensive mobile media content offerings, including personal content development, listings and navigation, and much, much more. All play and no work wouldn't ring true on a mobile device, so we've included numerous personal productivity applications as well.

### Games

Recreational products involving one or more players where the goal is competition or execution of some skill-based task.

- *Action/Adventure*
- *Board*
- *Card and casino*
- *Classic and arcade*
- *Client/server*
- *Multiplayer*
- *Puzzles and quizzes*
- *Racing*
- *Simulation*
- *Sports*
- *Strategic/Board*
- *Trivia/Puzzles*

### Music & Media

Products and content designed to provide services for media companies; to bring mobile content directly to mobile phones; and for storage and manipulation of content such as tones and graphics.

- *Audio and graphic libraries*
- *Bar code readers*
- *City navigation*
- *Communities, chat, and date*
- *Database management*
- *Fun (sport, lifestyle, comics)*
- *Instant messaging (IM)*
- *Image and image management*
- *Mobile content management*
- *Mobile Web logs*
- *Music (tones, others)*
- *Personalization*
- *Video streaming and image manipulation*
- *Web camera services*

### Personal Productivity

An application and/or content that lets users find practical solutions to real-world problems.

- *Travel expense reporting and log*
- *Sales log*
- *World traveler help*
- *Maps*
- *Dictionaries*

www.forum.nokia.com/PRO

## Nokia Developer Platforms

Nokia's Developer Platform approach promotes segmentation without fragmentation. Consumers want devices that are stylish and functional. Nokia satisfies both demands with device platforms that can be implemented on a variety of factors and support the latest mobile technologies.

For the latest list of Nokia devices, visit www.forum.nokia.com/devices.

### Series 40 Developer Platform

www.forum.nokia.com/series40

The Series 40 Developer Platform features support for powerful, standards-based technologies in a slim, user-friendly design. Targeting mass-market audiences, the platform gives operators and content aggregators a tremendous opportunity for connecting to volumes of new customers. Series 40 Developer Platform 2.0 augments the platform's capability for delivering robust, media-rich applications by offering expanded support for Java™, browsing, and Multimedia Messaging Service (MMS) while adding support for Open Mobile Alliance (OMA) Digital Rights Management (DRM) and OMA Client Provisioning.

### Series 60 Developer Platform

www.forum.nokia.com/series60

The Series 60 Developer Platform, the world's leading smartphone platform, brings open standards and multivendor support to the smartphone market. More than 100 global operators offer Series 60 devices. Series 60 Developer Platform 2.0 extends the previous release by providing Symbian OS v7.0s native APIs; Connected Limited Device Configuration (CLDC) 1.0, Mobile Information Device Profile (MIDP) 2.0, and Java APIs for Bluetooth (JSR-82), Wireless Messaging API (JSR-120), and Mobile Media API (JSR-135); XHTML browsing over TCP/IP; MMS messaging with Synchronized Multimedia Integration Language (SMIL); and OMA DRM (OMA forward-lock) and OMA Client Provisioning.

### Series 80 Developer Platform

www.forum.nokia.com/series80

The Series 80 Developer Platform is an ideal choice for delivering secure, powerful, and manageable applications. The Series 80 Developer Platform provides Symbian OS v7.0s native APIs; Java Personal Profile as well as CLDC 1.0, MIDP 2.0, and Java APIs for Bluetooth (JSR-82), Wireless Messaging API (JSR-120), and Mobile Media API (JSR-135); XHTML browsing over TCP/IP; MMS messaging with SMIL; and OMA DRM (OMA forward-lock) and OMA Client Provisioning.

## Active Desk for Nokia Series 60

Active Desk™ for Nokia Series 60 is the ideal solution for personalizing Series 60 smartphones. The application allows users to fully personalize the phone display, including selecting wallpaper, text colors, fonts, and operator logos. Active Desk provides five customizable views of essential day-to-day information, including calendar entries, to-do lists, and messages. Active Desk is a best seller in ratings from Nokia Software Market and Handango.

Works on Series 60 Developer Platform, Series 80 Developer Platform
Enabling technology: Symbian OS

cibenix

Cibenix Ltd., based in Dublin, Ireland, has been a leading provider of software solutions for mobile devices since 2001, with expertise in both Symbian OS and Java platforms. Cibenix provides products for both the consumer and the enterprise/operator markets. Its award-winning products, which allow end users and operators to customize and personalize their mobile devices, are installed on tens of thousands of mobile devices across the globe in multiple languages.

Contact: info@cibenix.com

## smart2go

The smart2go™ product family provides on-board navigation and routing solutions for smartphones. It integrates content channels such as city guides, event calendars, movie guides, and directory services with navigation, mapping, route planning, address searching, and messaging capabilities. smart2go's built-in GPS support allows for automatic path tracking and en route waypoint switching including audio messages. Based on a flexible channel concept, the mobile content player handles local content, update packages, and online content streams in parallel. Packages with selected cities up to a complete country wide coverage (UK, Germany) available.

Works on Series 60 Developer Platform, Series 80 Developer Platform
Enabling technology: Symbian OS

gate5

gate5 AG is a leading supplier of location-based software and services for major cities in Europe and the United States. In addition to delivering mobile client applications, gate5 offers complete solutions including UI development, content integration, user administration, and billing.

Contact: christof.hellmis@gate5.de
URL: www.gate5.de

## MediaBrowser

The new paradigm in mobile browsing has arrived: MediaBrowser enables subscribers to download multiple pieces of content all at once, and to browse the material online or offline. Never again will they have to endure the exasperation that accompanies click-and-wait browsing!

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technologies: J2ME, Symbian OS

ITFinity fresh ideas

ITFinity Solutions provides specialty business solutions to wireless operators. The company is research oriented; its solutions are in the areas of terminal applications, middleware, and messaging platforms. Customers include Nokia, Hutchison-Orange, Yahoo! Mobile, MSN Mobile, Spice Telecom, IDEA Cellular, and Telecom Plus.

Contact: corp@itfinity.com
URL: www.itfinity.com

## Opera Browser

The Opera browser provides mobile phone users with easy access to the full Web. Opera's Small-Screen Rendering™ technology reformats ordinary Web pages to fit on the screens of mobile devices. Opera, the most popular application for devices built on the Series 60 Developer Platform, is preinstalled on millions of handsets and has been downloaded more than 600,000 times by end users. In All About Symbian, a reviewer writes, "If I could add only one application to my phone, Opera would be it."

Works on Series 60 Developer Platform
Enabling technologies: Symbian OS v6.1 and higher

OPERA software

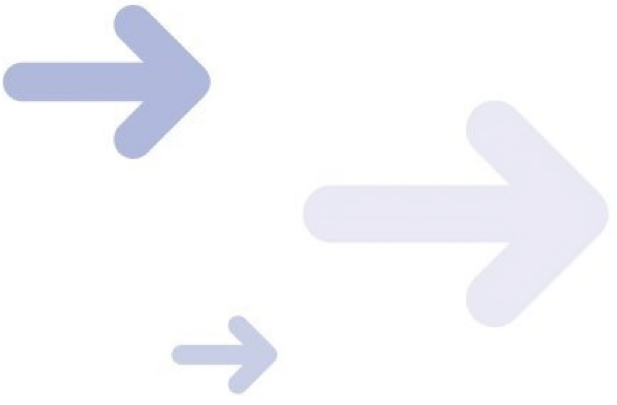

Opera Software ASA is an industry leader in the development of Web browsers for the desktop and mobile device markets. The Opera browser has received international recognition from end users and the industry press for being faster, smaller, and more standards-compliant than other browsers, and has gathered a cult following on the Internet.

URL: www.3g-scene.com

## Premium IQ Test

Premium IQ Test was designed under the supervision of psychologists and has been taken by more than 1 million subscribers worldwide. This application is composed of 50 questions and features a comprehensive, personalized report that can be accessed via PC. Premium IQ Test is available in English, French, and Chinese.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technologies: J2ME, DoJa (Java for DoCoMo)

Incorporated in Hong Kong and London in 2001, Anxa Digital Entertainment develops and edits interactive personal improvement and knowledge entertainment services. Used by more than 1 million subscribers worldwide, the company's products are currently available in 12 countries with more than 100 applications available.

Contact: fabricegaussen@anxamobile.com
URL: www.anxa.com

## FriendsFinder

FriendsFinder is a popular location-based mobile community service that allows users to find their friends on the Web. Each user has a list of friends who share location information. FriendsFinder has multiple user interface options: SMS, MMS for maps and pictures, WAP, the Web, PC client, and HTML client. Operators can offer FriendsFinder as a stand-alone service; many find that users love having the service integrated with other community-based services.

colibria
MOBILE INTERNET

Colibria AS is a leading provider of mobile community messaging solutions such as OMA Instant Messaging and Presence Service (IMPS), Mobile Organizer, FriendsFinder, and Mobile Chat. Colibria offers mobile operators a flexible way to introduce messaging and community-based solutions, and to share content and presence information. Colibria works with operators worldwide.

## 3D Pet Fish

This fun application turns mobile devices into 3-D aquariums. It was the winner in four countries of the Nokia Series 60 Asia Challenge for 2003. 3-D Pet Fish™ is a screen saver, an interactive alarm clock, and a game. Users can observe the fish's development and interact with it by feeding, caring for, and playing with it regularly. Users also can change background scenes and creatures by downloading new content via GPRS. 3-D Pet Fish gives mobile phones a whole new persona.

# Games

## Players Casino

Players Casino™ is a suite of casino games for mobile devices that consists of blackjack, slot machine, roulette, Texas Hold'em poker, and solitaire. These are the non-cash versions of the games. Users play against either a slot machine in the slots game or a casino dealer in the four other games. Players can bet play money on the outcome of the cards.

Works on Series 40 Developer Platform, Series 60 Developer Platform, Series 80 Developer Platform
Enabling technology: J2ME

## Einstein Challenger Chess

3G-Scene's Einstein Challenger™ Chess is among the world's best chess games for mobile phones. First to support GPRS, Einstein Challenger Chess is a classic online chess game that allows users to compete against other players around the world. Users can also play against their phones with the game's built-in artificial intelligence. Every chess rule is obeyed and each level gets increasingly harder as the phone considers its options more carefully, so it takes progressively longer for it to move.

Works on Series 60 Developer Platform
Enabling technology: Java MIDP 2.0

## Atomic Blog

Atomic Blog is a community-building tool where users can post entries in an online diary via mobile devices or the Web. The user-friendly interface allows subscribers to update their blogs using SMS and MMS. These updates are reflected immediately, and other community members can post comments for each entry.

Works on Series 40 Developer Platform, Series 60 Developer Platform, Series 80 Developer Platform
Enabling technologies: SMS, MMS

## Atomic Xgames: Cross-media multiplayer games

Atomic Xgames is a suite of innovative multiplayer games for mobile devices and the Web. The suite consists of turn-based games such as board, strategy, and card games. Unlike standard mobile or Web games, Atomic Xgames allows mobile users to play games simultaneously with Web-based players.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technology: Java MIDP 2.0

## Atomic Chat: Cross-media (web + mobile) chat

Atomic Chat is a cross-media community-based tool that allows users to interact across mobile devices and the Web. This application features avatars that can be customized through an online wardrobe and shopping mall for extensive personalization and unlimited fun. By accessing the user-friendly interface, subscribers can chat across various media, including mobile J2ME, the Web, and SMS.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technology: Java MIDP 1.0

[ ACTIVATE ]

Activate Interactive Pte Ltd is a leading developer of globally distributed games, entertainment applications, and cross-media products for mobile phones, the Web, and interactive TV. Founded in 1997 and headquartered in Singapore, the company's expertise is integrating applications across various interactive media, providing users with exciting entertainment experiences.

Contact: dawn@ActivateInteractive.com
URL: www.ActivateInteractive.com

## Agile Forces

Agile Forces is a multiplayer, turn-based war strategy game. Players from all over the world can challenge each other over their GPRS connections through Agilemobile's matchmaking server, or they can choose the single-player mode, which features 60 challenging campaigns. In multi-player mode, users can choose from 50 multiplayer maps. Battle scenarios take place in three environments — grassland, desert, and arctic. Agile Forces features more than 100 levels of play for long-lasting, quality entertainment.

Works on Series 80 Developer Platform
Enabling technology: Symbian OS

## Agile Fighter

Agile Fighter is a fast-paced fighting game with stunning graphics and astonishingly fast game-play — some of the fastest ever on a mobile device. Users can play alone or link up and play with their friends over Bluetooth wireless connections. High-scoring players put their names at the top of their high-score list.

Works on Series 60 Developer Platform
Enabling technology: Symbian OS

agileMOBILE
MOBILE SOFTWARE DEVELOPER

Agilemobile.com Co. Ltd. develops and markets multimedia communication software and entertainment solutions for mobile devices. The company focuses on development of application features and benefits that drive subscriber-base growth, average revenue per user maximization, and demand for next-generation data services and devices.

Contact: smichaels@agilemobile.com

## Questions for a Champion

Questions for a Champion is adapted from a popular French television show watched by 6 million viewers. The game is made up of three rounds of general knowledge questions. Users answer as many questions as possible during these three rounds to qualify for the Hall of Fame. Questions for a Champion is available in English and French.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technologies: J2ME, DOJA

## Palm reading

Palm reading teaches users how to interpret the lines in the palms of their hands. This application is composed of four categories representing important facets of life. For each category, users answer six questions based on the lines of their hand. Users are given an insightful result based on the chosen category.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technology: J2ME

anxa

Incorporated in Hong Kong and London in 2001, Anxa Digital Entertainment develops and edits interactive personal improvement and knowledge entertainment services. Used by more than 1 million subscribers worldwide, the company's products are currently available in 12 countries with more than 100 applications available.

Contact: fabricegaussen@anxamobile.com
URL: www.anxa.com

## Arthur's Destiny

In Arthur's Destiny, players claim the mighty sword Excalibur and become Arthur, the famed king of England. Saxon marauders are invading the rich lands of England and must be stopped. As Arthur, players face exciting adventures alongside the brave knights of the Round Table, battling Saxon invaders, to become legendary heroes.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technologies: Java MIDP 1.0 and higher

## Marble Revolution

Marble Revolution brings mechanical labyrinth games to mobile phones. In this ultrafast game, players experience 11 challenging levels in the quest to collect all the diamonds. Choosing from two modes, players steer via cursor or internal camera through 3-D graphics filled with special effects. Cannons, teleporters, mines, and fire add to the excitement.

Works on Series 60 Developer Platform
Enabling technologies: Symbian OS v6.1 and higher

## Taxi Fever

In the action-packed multiplayer game Taxi Fever, players compete with other taxis to transport customers as quickly as possible without breaking traffic laws. Drivers must watch out for pedestrians and quick-changing traffic lights. The game provides onboard navigation and a city map for easy orientation.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technologies: Java MIDP 1.0 and higher, Symbian OS v6.1 and higher

bit-side gmbh

bit-side GmbH takes mobile entertainment to the next level. The company produces innovative and creative products built on state-of-the-art design and technology. The bit-side portfolio includes single-player and multiplayer games based on Java technology and the Symbian operating system, as well as 3-D camera games.

Contact: mobile@bit-side.com
URL: www.bit-side.com

## Attack Mission: Atlantic Harbour

In Attack Mission: Atlantic Harbour, players take to the skies in air-to-air and air-to-ground combat to defend the Republic of Slovostrania from insurgent rebel forces. To keep the republic safe, players must bomb attacking ships, battle waves of enemy aircraft with machine guns, and avoid getting hit by rebel fire.

Works on Series 40 Developer Platform
Enabling technology: Java MIDP 1.0

## Pool Challenge

Pool Challenge, a single- or two-player sports game, is based on the popular game Eight Ball, played in pool halls and competitions all over the world. Pool Challenge is one of the first fully featured mobile pool games available today.

Works on Series 40 Developer Platform
Enabling technology: Java MIDP 1.0

## Rally Challenge

In Rally Challenge, players select their car before competing in this fast-paced, single-player racing game. Players face unpredictable conditions such as rain and snow while avoiding trees and other racers in the quest to achieve the fastest overall time and win 1st place.

Works on Series 40 Developer Platform
Enabling technology: Java MIDP 1.0

BLUE SPHERE GAMES

Blue Sphere Games Ltd., a mobile services software developer, specializes in creating Java games and services for the mobile communications industry. The company maintains a large portfolio of Java games that are currently deployed in partnership with mobile operators and service providers worldwide.

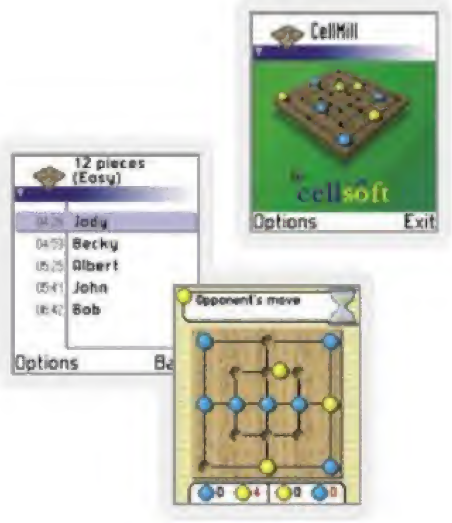

Contact: partner@bluespheregames.com
URL: www.bluespheregames.com

## CellPoker

Poker goes mobile, thanks to CellPoker! Now subscribers can play poker practically anywhere. Two friends can play against each other via a Bluetooth wireless connection, or users can play against the phone. CellPoker follows the rules of five-card draw poker; it's very easy to play.

Works on Series 60 Developer Platform
Enabling technology: Symbian OS

## CellMill

The CellMill multiplayer game challenges players to finish a battle that began centuries ago. CellMill demands strategy akin to that needed for chess or checkers, yet anyone can learn the rules in a matter of minutes.

Works on Series 60 Developer Platform
Enabling technology: Symbian OS

## CellHalma

Users can play CellHalma against their smartphones or with friends over Bluetooth connections. CellHalma is an exciting strategy game invented by the Victorians in the late 1800s. The objective is to move all the pieces from one corner to the opposing corner.

Works on Series 60 Developer Platform
Enabling technology: Symbian OS

cellsoft
Life is Mobile

Cellsoft is a mobile technology company that has been developing software for Symbian OS since 1999. The company's development services focus is on customer-specific applications. The company's product focus is on multiplayer games. More than 100,000 customers have downloaded Cellsoft's current games CellPoker™, CellMill™, and CellHalma™.

URL: www.cellsoft.com

## Andre Agassi Com2uS Tennis

Andre Agassi Com2uS Tennis lets subscribers join Grand Slam champion Andre Agassi in playing tournaments around the world. Players perfect their ground strokes, slices, lobs, and court positioning on both clay and hard court surfaces in the quest to be champion of the tennis world.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technologies: Java MIDP 1.0 and 2.0

## Com2uS Backgammon

Players challenge various eccentric characters in Com2uS Backgammon™, an exciting mobile edition of the world's oldest-known game. In the course of the game, players must take all of their opponents' gold. By aiming for gammon or backgammon, players can double or even triple their winnings. Subscribers can compete against the computer or challenge a friend in two-player mode.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technologies: Java MIDP 1.0 and 2.0

## Com2uS Bowling 2

Subscribers experience their own personal mobile bowling alley in Com2uS Bowling 2™, the latest in the Com2uS bowling series. New characters, different bowling balls, professional bowling-league rules, and realistic pin actions are just some of the features in this new edition. Players can challenge the computer or compete against a friend in a two-player game.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technologies: Java MIDP 1.0 and 2.0

com2uS

Com2uS Corporation is a leading mobile entertainment provider based in Korea. The company has developed a reputation for creating innovative and entertaining games and applications, which are available in more than 40 countries in Asia, Europe, and North America.

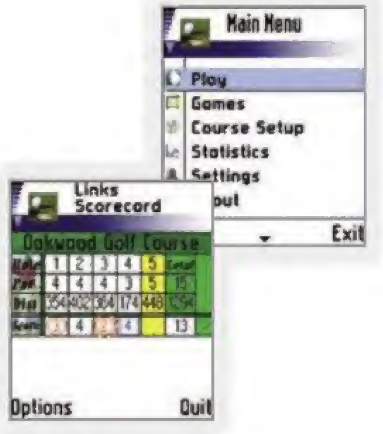

Contact: saeran@com2us.com
URL: www.com2us.com

## Aces Texas Hold'em — No Limit

Aces Texas Hold'em — No Limit simulates real tournament poker. Players can bet any amount or go "all in" while playing against up to 22 players in a tournament-style game. Or players can join a game in progress when a seat opens up. The game allows users to customize blinds, game speed, and player intelligence. It also records stats on the number of hands played, hands won, folds, and more.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technologies: J2ME, Symbian OS

## Links Scorecard

In Links Scorecard, created with the help of PGA pro Eric Chiles, players can record their golf scores and set up courses and tees ahead of time. Subscribers play and store courses and games, and their performance can be analyzed after each game or graphed over a period of time. The professional scorecard also highlights eagles, birdies, and bogeys.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technologies: J2ME, Symbian OS

## Aces Omaha — No Limit

Aces Omaha — No Limit is the next big poker game. Players who love Texas Hold'em will also love this game. Each player is dealt four cards. They must then play two of those cards in combination with three community cards. With each turn, players can choose to raise the stakes and go "all in."

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technologies: J2ME, Symbian OS

CONCRETE SOFTWARE

Concrete Software, Inc. develops innovative, high-quality personal productivity applications and games. The company supports over 100 different mobile devices with its award-winning Symbian OS and J2ME applications. Currently, Concrete Software is expanding into localized markets with applications in German, Czech, Chinese, and more.

From original mobile media content production to the platforms and applications needed to acquire, manage, and deliver that content, U-TURN is playing a leading role in defining the future of mobile media.

Contact: denisa.dufkova@u-turn.cz
URL: www.u-turn.cz

## Realtones

Realtones are made from original recorded music, sounds, or speech and can play for up to 30 seconds. Realtones are binary files in WB-AMR, RMF, and AAC formats (maximum file size 100 KB) that subscribers can download to their mobile phones over a WAP connection. WES also offers Realtones as a hosted service. Whenever real music is used, a license from the record label is required.

Works on Series 40 Developer Platform, Series 60 Developer Platform, Series 80 Developer Platform

## Ringback Tones

Ringback Tones are call-waiting tones that enable subscribers to personalize their phones by replacing the traditional ringing sound a caller hears before the phone is answered with a 30-second or shorter clip of music or sound effects. Ringback Tones are independent of mobile phones; instead of being downloaded and stored in a particular phone, Ringback Tones are stored on a server at a central telecommunications switch from which they are streamed to the mobile networks. In addition, Ringback Tones create a strong marketing effect with little effort on the operators' part. For example, in South Korea, the service generated $100 million in 15 months after launch, and 35 percent of subscribers were using the service, spending an average of about $1.50 a month per user. Whenever real music is used, a license from the record label is required. A technical solution and hardware are required from a platform provider to launch the service.

## Ringback Tone Solution

With the ringback tone solution, callers hear music or voice clips instead of the traditional ring sound when calling ringback tone subscribers. This personalized mobile Internet service provides mobile operators with a source of incremental revenue. WiderThan.com has diversified its ring-back tone solution to address mobile operators' system environments around the world. The service, first offered in May 2002 by Korea's largest mobile operator, SK Telecom, attracted 1 million subscribers in its first three months.

WiderThan.com Co., Ltd. is the world's first ring-back tone solution and service provider; the company manages service operations for the world's largest base of ring-back tone service subscribers. The company, founded in June 2000 by executives of SK Telecom and funded by SK Group, is also the first company in Asia to receive strategic investment from Nokia Venture Partners. As an integral player in the mobile Internet value chain, WiderThan.com's key differentiation is its proven mobile Internet market experience and technical expertise.

## IM+ Mobile Instant Messenger

IM+ brings mobile access to the most popular IM systems, enabling users to exchange messages using their mobile phones or PCs. The application enables long text messages with immediate delivery, utilizes existing IM accounts from subscriber PCs and supports MSN, ICQ, AOL, Yahoo!, and Jabber. IM+ also allows file transfers and multimedia messaging. IM+ is a winner of the Series 60 Platform Contest and is a best-selling application on Handango.

Works on Series 40 Developer Platform, Series 60 Developer Platform, Series 80 Developer Platform
Enabling technologies: J2ME, Symbian OS

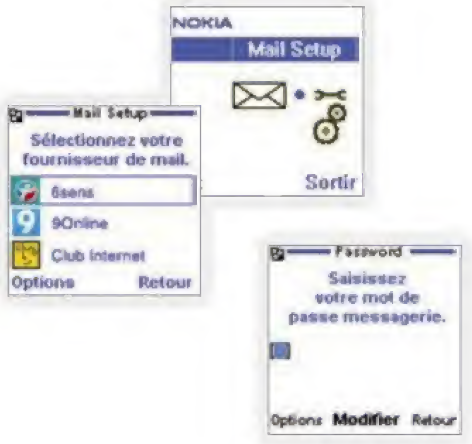

## IM+ Voice

IM+ Voice, a complete voice messaging solution for mobile devices, is oriented to a wide range of users, from individuals and corporations to mobile operators and service providers. IM+ Voice supports long text messages with immediate delivery, and utilizes existing IM accounts from subscriber PCs.

Works on Series 60 Developer Platform, Series 80 Developer Platform
Enabling technology: Symbian OS

SHAPE Services GmbH, founded in 1999, is a German company that develops and distributes applications for multiple mobile platforms. SHAPE is researching new potentials for IM to include the integration of text, audio, and digital imaging for smartphones, mobile phones, PDAs, and PCs.

Contact: maria@shapeservices.com
URL: www.shapeservices.de

## Mail Setup

Mail Setup allows mobile devices automatic configuration for synchronizing email via GSM or GPRS connection. With Mail Setup, users can configure their mailboxes with just a few keystrokes. Mail Set-up can be easily customized.

Works on Series 40 Developer Platform, Series 60 Developer Platform, Series 80 Developer Platform
Enabling technologies: Java (WMA, SMS API, MIDP 2.0), Symbian OS v7.0 and higher

abaxia

Abaxia is a French software publisher specializing in mobile embedded solutions that turn smartphones into wireless terminals. Abaxia's management experience in mobile computing includes telecommunications, information systems, and Internet technologies.

URL: www.abaxia.com

## Agile Messenger

Agile Messenger Enterprise provides for secure seamless secure connectivity simultaneously with your corporate private IM networks utilizing OMA compliant IMPS (Wireless Village), Microsoft Live Communications Server, or XMPP standards, while also providing access to the public IM networks of Yahoo, AOL, MSN, ICQ, QQ, and Jabber, supporting all of your instant messaging needs.

Works on Series 40 Developer Platform, Series 60 Developer Platform, Series 80 Developer Platform
Enabling technologies: J2ME, Symbian OS

agileMOBILE
MOBILE SOFTWARE DEVELOPER

Agilemobile.com Co. Ltd. develops and markets multimedia communication software and entertainment solutions for mobile devices. The company focuses on development of application features and benefits that drive subscriber-base growth, average revenue per user maximization, and demand for next-generation data services and devices.

Contact: smichaels@agilemobile.com
URL: www.agilemobile.com

## BEDD

BEDD is a peer-to-peer mobile application that lets people communicate for friendship and dating and for buying and selling. When BEDD notifies users that a friend or colleague is close by, they can immediately chat free via Bluetooth wireless connection, or they can use SMS, MMS, voice, IM, or e-mail. For a monthly fee of $0.98, users have access to a full menu of functions.

Works on Series 60 Developer Platform
Enabling technology: Symbian OS

BEDD™
Bringing People Together

BEDD develops social-networking software, including wireless community applications and services. The company, which was founded in 2001, launched its peer-to-peer application in May 2004 in Singapore. Product rollouts are ongoing in Asia, Europe, and the Americas.

Contact: sjc@bedd.com
URL: www.bedd.com

## Active Mail for Nokia Series 60

Active Mail™ for Nokia Series 60 is the ideal companion to the e-mail functions of Nokia Series 60 smartphones, extending the devices' messaging capabilities. Active Mail is an e-mail download manager, increasing convenience and reducing costs by automatically downloading only specified e-mails. With Active Mail and a Nokia Series 60 smartphone subscribers can always be connected to their mailboxes.

Works on Series 60 Developer Platform
Enabling technology: Symbian OS

cibenix

Cibenix Ltd., based in Dublin, Ireland, has been a leading provider of software solutions for mobile devices since 2001, with expertise in both Symbian OS and Java platforms. Cibenix provides products for both the consumer and the enterprise/operator markets. Its award-winning products, which allow end users and operators to customize and personalize their mobile devices, are installed on tens of thousands of mobile devices across the globe in multiple languages.

## Cover UI

Cover UI brings advanced functionality to the external screen of clamshell phones. Cover UI is a full-color external LCD software application that allows users to personalize their phone with animations and wallpapers. The application provides a continuous experience between internal and external screens, making mobile phones more consistent to use.

Works on Series 60 Developer Platform
Enabling technology: Symbian OS

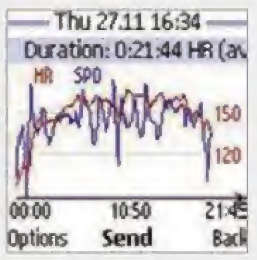

## TRY

TRY is a tool that automatically tests the user interfaces of applications developed for Symbian OS. It can be used in all stages of testing, from smoke and system testing through regression and localization testing, on devices such as the Nokia 6600 imaging phone, the Nokia 9500 Communicator, and PC emulators. TRY automates tedious tasks that are prone to input errors, shortening development cycles and reducing technology risks. Users write scripts that, when executed, automate content creation, keyboard manipulation, screen taps, logic flow controlling branching logic, and on-error decision-making. The scripts can be run as many times as required, saving time, money, and effort. TRY also validates output using text and screenshot comparison.

## Waplane

Sofor's Waplane application enables online access to information systems and applications based on the J2EE platform and Lotus Domino from any browser-equipped device. The implementation requires no changes in the applications or information systems, yet the functionality of the applications can be fully utilized with a mobile device. Waplane supports multiple terminal types including GPRS and WAP mobile devices, PDAs, i-mode terminals, communicators, and others.

Works on Series 40 Developer Platform, Series 60 Developer Platform, Series 80 Developer Platform
Enabling technology: J2EE

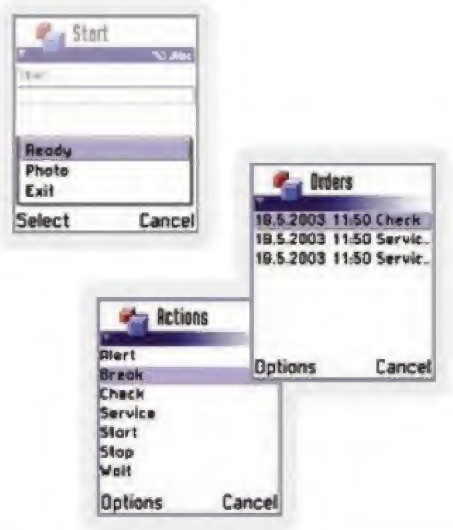

## Lotus Notes on Nokia Series 80 Devices

Sofor offers a solution that integrates Lotus Notes and Series 80 Developer Platform 2nd Edition. The first device based on the platform — the Nokia 9500 Communicator — was announced recently. The application utilizes Waplane and IBM's DB2e technology. The solution, built for the new mobile enterprise device, synchronizes data over the air between IBM Lotus Domino applications and Symbian OS phones. This solution is the first to use Lotus Notes on the Nokia 9500 Communicator.

Works on Series 80 Developer Platform
Enabling technology: Symbian OS

Sofor Oy, founded in 1991, is a privately owned Finnish software company specializing in IT enterprise solutions. In addition to producing groupware for businesses, Sofor helps a wide variety of information systems work for mobile users. The company has more than 130 employees.

Contact: sales@waplane.com
URL: www.waplane.com | www.sofor.fi

## ISMO (Fleet Management)

ISMO® uses GPS to collect real-time data on a vehicle's position, speed, and direction. It also registers vehicle stops, reasons for those stops, and their duration. This information can be linked to vehicle technical data — such as braking activity, fuel consumption, and temperature — to form a detailed picture of what the vehicle is doing at any time.

Works on Series 40 Developer Platform, Series 60 Developer Platform, Series 80 Developer Platform
Enabling technology: J2ME

## MASi (Sales Force Automation)

MASi™ mobile solution is designed to enhance the effectiveness of mobile sales forces. It can be customized for individual organizations' specific needs. In addition to facilitating traditional sales functions, MASi is also suitable for scheduling maintenance work, managing a spare-parts inventory, and communicating alerts.

Works on Series 80 Developer Platform
Enabling technology: J2ME

## Thalia (Homecare)

Thalia® provides mobile home nurses and other home help personnel with access to all patient information such as care history, medication, and lab results. Users can manage patient information via a wireless network and a mobile workstation.

Works on Series 80 Developer Platform
Enabling technology: J2ME

SYBASE®

Sybase® Inc. is one of the world's largest independent software vendors. The company delivers end-to-end solutions for the unwired enterprise, including enterprise infrastructure business solutions and mobile software solutions for information management, development, and integration.

Contact: kim.ekman@sybase.com
URL: www.sybase.com

## SysRoam

SysRoam™ gives subscribers remote access to their mobile phones. Users can access their contacts and calendar information to check appointments and get notifications of missed calls. They can also activate call forwarding, activate incoming SMS forwarding, and lock the phone by sending an SMS request or by accessing their phone via the Web.

Works on Series 60 Developer Platform, Series 80 Developer Platform
Enabling technology: Symbian OS

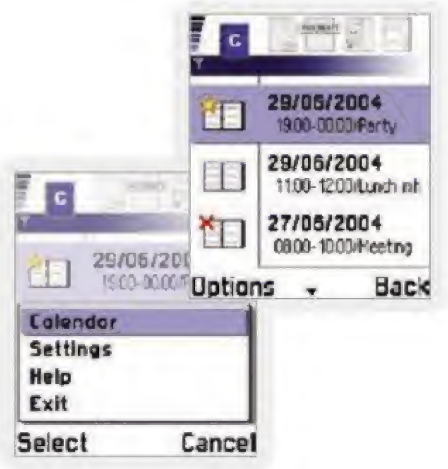

## SysPass

SysPass™ equips mobile phone users with the ability to securely manage multiple user IDs and passwords. SysPass stores and provides safe and easy use of all passwords, including ATM codes and credit card PINs.

Works on Series 60 Developer Platform, Series 80 Developer Platform
Enabling technology: Symbian OS

Syscrypt Ltd. develops end-user and enterprise solutions for mobile devices. The company's mission is largely influenced by the current expansion in the mobile communications and mobility industries, including the development of the mobile software and services market as well as consolidation within the industry.

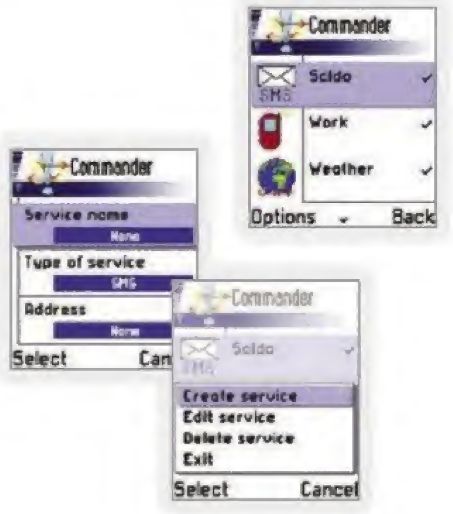

Contact: gkassab@syscrypt.com

## English for Business

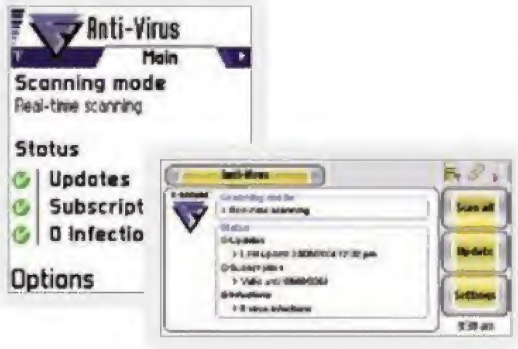

English for Business (EFB) is a series of training modules that teaches key skills for users who want to learn and improve their English in the workplace. Using FID's patented EduMax technology, EFB combines high-quality spoken words with related pictures and text synchronized with audio. Users learn quickly, thanks to the multimedia presentation. Among the topics covered are communication skills, arranging meetings, working with customers, and interviewing. EFB is one of the best ways to learn English on the run.

Works on Series 40 Developer Platform, Series 60 Developer Platform
Enabling technology: J2ME

First International Digital

First International Digital (FID) develops and licenses multimedia tools and applications for mobile phones. The company's SuperMedia™ technology, which includes MP3i™, maxMIDI™, and EduMax™, is used by device manufacturers, operators, and content providers to deliver rich multimedia content for entertainment and education. From mobile karaoke and music services to mobile learning, FID is a leader in multimedia.

## MightyBackup

MightyBackup is a wireless Internet application and service that provides backup and restore functionality to a lost, stolen, or damaged mobile phone. The MightyBackup service consists of a small client application residing on the mobile phone, a Web-based portal providing access to the subscriber's data vault, and the MightyBackup infrastructure running in a carrier-grade data center. MightyBackup enables subscribers to quickly and easily send their address books to a new mobile device. Additional features include scheduling options and a secure Web application that can be viewed from any computer with an Internet connection. With MightyBackup, users can back up their address books in seconds.

# Addendum

## FaceStore Messaging

**Music & Media**

With FaceStore® Messaging, users can send fully animated talking-head messages to friends' phones using MMS. The user records a message and chooses one of many available Faces (such as talking animals, aliens, birthday cakes, and golf balls) to deliver the message.

Works on Series 60 Developer Platform
Enabling technologies: Symbian OS v6.1 and v7.0s

## FaceStore Snap

**Music & Media**

FaceStore Snap, an add-on to FaceStore® Messaging, allows users to create talking Faces out of their own pictures. Users can put words into the mouths of friends, pets, or practically any object. The talking Face message can then be sent over MMS, using FaceStore Messaging.

Works on Series 60 Developer Platform
Enabling technologies: Symbian OS v6.1 and v7.0s

anthropics
the face of mobile communication

Anthropics Technology Ltd is the creator of FaceStore®, a visual messaging technology. With proven end-user appeal, FaceStore boosts operator revenues through software sales and increased message traffic. FaceStore can be preinstalled on mobile devices or made available for over-the-air (OTA) download. FaceStore is also available as a WAP service.
