Requests regarding Slot Number changes for Custom DLC or questions about the Tools etc go here: Custom DLC on ProjectDIVA.net

Intro

Custom DLC are usermade Extra Songs and Modules which aren't released by SEGA. All the Custom DLC here are compatible with Project DIVA 2nd, Project DIVA Extend and Project DIVA 2nd#. Anyway in case of custom DLC songs it wouldn't make any sense to install them to Project DIVA 2nd or 2nd# because those songs are already in the game. Attention: Custom DLC doesn't work on Dreamy Theater / Dreamy Theater 2nd!
It still does require a CFW to make this kind of DLC to work.

Module Files
Tools
Tutorials

Using Custom DLC

Basic facts and installing nploader:
1) You need to softmod your PSP. You don't need anything fancy to do it and the risk to brick (brick: homebrew vocabulary, meaning to break your console - it's as useful as a brick then) your PSP is almost 0%. Here is good guide how to softmod your PSP to latest PRO-B firmware.
2) To make custom DLC work in the [[#|games]] you also need the nploader plugin. DON'T FORGET IF YOU USE PRO-CFW TO DISABLE THE NO DRM ENGINE IN THE RECOVERY MENU OF YOUR CFW!
Copy "nploader.prx" into the "seplugins" folder in the root of your Memory Stick. You can download nploader here: Mediafire Download
3) Add the following line to GAME.TXT in seplugins folder: ms0:/seplugins/nploader.prx 1 (if using a PSP Go, replace ms0:/... with ef0:/... - if the folder or the file do not exist, create them) IF YOU USE TRANSLATION PATCH BE SURE NPLOADER WILL BE LOADED BEFORE THE TRANSLATION PATCH! SO PUT THE LINE BEFORE THE TRANSLATION PATCH LINE!
4) Restart the VSH by choosing the option in the Recovery Menu (press SELECT on the XMB) or restart PSP (3 seconds power button and turn PSP back on, slower option). Then start the game.

Installing custom DLC:
1) Open the zip files and navigate to the EDAT files in them, then open the directory X:\PSP\GAME\ULJM05681\ on your MemoryStick.
2) Copy the EDAT of custom DLC songs into the "B"-folder there. DLC modules belong to the "C"-folder, "D"-folder for Edit Mode Music Data, Rooms to the "E"-folder, Room Accessories to "F" (floor), "G" (shelf) or "H" (wall) and Stages belong to "K". It depends on the item. In case of Custom DLC Stages you may have to create the "K"-folder first.
3) Afterwards disconnect your PSP from USB and start the game.
4) In case of Project DIVA Extend and 2nd# you need to import the DLC ingame in the options menu, then the last option to get into the import menu and afterwards choosing the 1st option to import Song DLC and the 2nd option to import Modules.
5) Congratulations, your custom DLC should be listed in the "Extra" menus of Song selection / Module selection.

Using Custom Loading Screens

1) Like the other Custom DLC you need to softmod your PSP first (see the information in **1)** of "Using Custom DLC".
2) Also you'll need to install the Translation Patch for Project DIVA Extend which is available here with an Install guide. If you want to keep to play Project DIVA Extend

Discontinued Games

Misc Games

Games we also like to add:
IA/VT, VOEZ, Zyon, BEMAGI, Miracle Girls Festival, Groove coaster, dynamix
Feel free to submit info!

Wiki-Version 12.0 rev180426
Wikipages are still in development

This is a fanpage about the Project DIVA game series.
This wiki is not associated with SEGA.

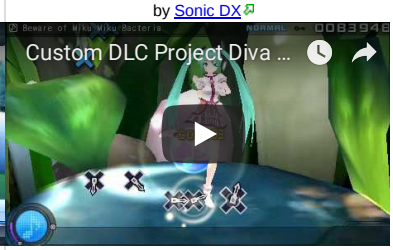

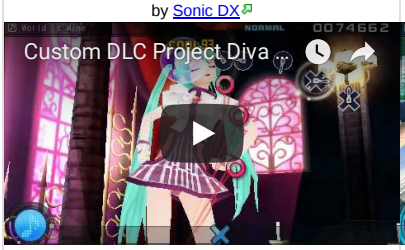

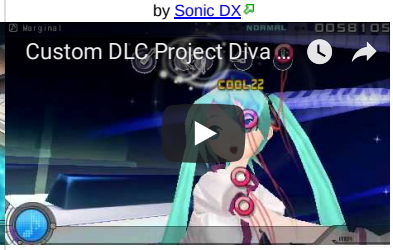

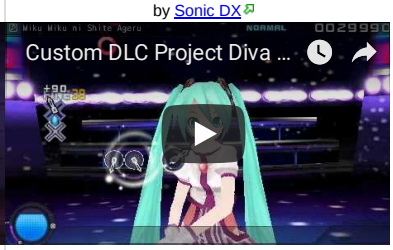

Project DIVA Series, Mirai and the MikuFlick Series © SEGA Japan
Hatsune Miku (Artwork) © KEI
Hatsune Miku (Voice & Character) © Crypton Future Media Inc.
VOCALOID © Yamaha Corporation

in japanese, you only need two files from the patch: "divaext_images.bin" and "divapatch.prx". All other files can be removed.
3) The next thing you'll have to get is the Loading Screen Pack with all original loading screens of the game. This pack gives you a good base before you can customiz them. You can get the pack here.
4) Copy the "divaext" directory into X:\seplugins\divapatch\ on your MemoryStick.
5) Now you can download the Custom Loading Screens below and replace the original Loading Screen files in the "divaext" directory with them. If you want to replace the original "load_07.png" Loading Screen for example just rename the downloaded file into "load_07.png" and replace the original file.
